

Job Title:	Mountain Bike Patrol
Reports To:	Mountain Operations Manager
Department:	1200 Mountain Patrol
Published Date:	12/14/2018

POSITION SUMMARY:

- Patroller will educate guests about safety considerations, monitor guests to ensure general mountain safety, and provide emergency medical care when necessary. This highly visible role requires a great deal of guest interaction, providing and promoting a safe environment for our guests and employees.

ESSENTIAL DUTIES:

- Provide professional, friendly and courteous service to guest and employees, including responding to medical emergencies on the mountain, transporting injured guests off the mountain, and ensuring general mountain safety.
- Develop and maintain working knowledge of Bike Patrol procedures.
- Patrol the Bike Park to ensure trail readiness and assist injured guests.
- Know, understand, and adhere to the 2018 Bike Park Safety Act and Spider Mountain rules and regulations.
- Complete all required documentation in a timely and professional manner including logs, accident reports and checklists.
- Follow safety procedures at all times. Report any existing or potential safety hazard to supervisor immediately and remedy when possible according to established protocols.
- Check safety equipment daily for proper function.
- Perform sweeps at the end of the day to ensure that all guests and employees are safely off the mountain.
- Complete all duties and tasks with the utmost regard for personal and guest safety.
- Continuing education and on-the-job training provided and expected.
- Special duties may include chairlift evacuation, out-of-bounds and/or night search and rescue activities.
- Responsibilities may include creation and maintenance of the trail within the bike park in cooperation with the bike park trail crew.
- Other duties as assigned.

EDUCATION & EXPERIENCE REQUIREMENTS:

Education:

- Current CPR for Healthcare Providers and Texas EMT certification required. National Registry EMT certification preferred.
- A valid driver's license is required.

Experience:

- Prior experience in EMT position preferred, especially in the outdoor environment.
- Outdoor rescue skills. Advanced level mountain bike riding skills preferred. Ability to ride all trails in all conditions. Excellent interpersonal skills.
- Must be able to work outside for extended periods of time in variable weather conditions and at high altitude.

PHYSICAL DEMANDS AND WORKING CONDITIONS:

- 60% of the work day is spent outdoors in constantly changing weather conditions at moderate altitude, including but not limited to extreme heat, cold, wet, snow, hail, and wind. 20% of the workday is spent indoors. 40% of the work day is spent biking, 40% of the work day is spent walking or hiking. Majority of walking and standing is done in an alpine environment.
- Occasionally lifting and carrying people and objects weighing in excess of 150 pounds, and occasionally pushing or pulling litters with injured guests weighing up to 300 pounds. Frequent use of mountain bikes and all-terrain vehicles. Constant use of near and far acuity and depth perception. Frequently climbing, balancing, reaching, handling, engaged in normal conversation, and use of color and field of vision. Occasionally stooping, kneeling, crouching, crawling, fingering, feeling.
- Frequent exposure to radiant energy. Occasional exposure to bio hazards associated with patient care, mechanical hazards, high exposed worksite, burns, explosives, toxic and caustic chemicals, fumes, odors, mists, gases and poor ventilation.
- Material and Equipment Directly Used: Mountain Bike, lifts, all-terrain vehicles, radio, hand tools, medical care equipment and simple office equipment. Must provide own downhill mountain bike and helmet.
- Required to work variable shifts, including weekends and school/public holidays.
